

## KOPERNIK GLOBAL UNCONSTRAINED

December 31, 2017

### INVESTMENT APPROACH

Kopernik's investment philosophy is centered on the belief that market inefficiencies present numerous opportunities to identify businesses that we believe are mispriced. The Firm utilizes bottom-up fundamental analysis to gain a thorough understanding of a company's business and valuation. Kopernik Global Unconstrained is a long/short equity strategy that seeks capital appreciation by investing in businesses across the world and among all market capitalizations that trade at significant differentials (discounts or premiums) to their risk-adjusted intrinsic values.

2013 period is strategy inception July 1, 2013 through December 31, 2013.

Valuations and returns are computed and stated in U.S. Dollars. Results reflect the reinvestment of dividends and other earnings. Composite returns are net of non-reclaimable withholding taxes. Gross of fee returns for the composite are presented after all trading expenses. Net of fee returns are presented net of estimated actual investment management fees, including performance fees, if any. Investor performance may be higher or lower.

**Past performance is no guarantee of future results.**

2014 Gross-of-Fees and Net-of-Fees Returns include certain expenses that should have been excluded from the returns calculations, which resulted in lower returns. Had the expenses been properly excluded from the calculations, Gross-of-Fees and Net-of-Fees Returns would have been higher by approximately 0.15%. Kopernik Global Investors, LLC claims compliance with the Global Investment Performance Standards (GIPS®). To receive a list of Kopernik Global's composite descriptions and/or GIPS® compliant performance presentations, please contact [administration@kopernikglobal.com](mailto:administration@kopernikglobal.com) or (813) 314-6100.

### IMPORTANT INFORMATION

The material herein is not an offer to sell or a solicitation of an offer to purchase securities of any kind.

This report may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements involve inherent risks and uncertainties, and we might not be able to achieve the predictions, forecasts, projections and other outcomes we may describe or imply. A number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions we express in these forward-looking statements. We do not intend to update these forward-looking statements except as may be required by applicable laws. Forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond our control and are difficult to predict. As a result, actual results could differ materially from those expressed, implied or forecasted in the forward-looking statements.

Please consider all risks carefully before investing. An investment in the Kopernik Global Unconstrained Master Fund, or any other vehicle using the same strategy, is subject to many risks including sudden changes in general market valuations and market liquidity. Investments in small and mid-capitalization companies also tend to involve greater risk and portfolio price volatility than investments in larger capitalization stocks. Further, investing in non-U.S. markets, including emerging and frontier markets, involves certain additional risks, including potential currency fluctuations and capital controls, restrictions on foreign investments, less governmental supervision and regulation, less liquidity, less disclosure, and the potential for higher market volatility, share expropriation, confiscatory taxation, and social, economic and political instability. Further, investments in energy and other natural resources companies tend to be greatly impacted by developments in global commodities markets, which can be more volatile than equity markets. The Fund is also subject to short selling risk. If the price of a security that has been sold short increases, there is no limit to the loss that could be incurred in covering a short sale.
